## \$TANDALONE EXPANSIONS

### What is the Initiation Pack (formerly Starter Kit)?

It is a 36-cards deck that lets players discover Clash of Decks easily. You can get it for free at a game store or through our online store : [www.clashofdecks.com](http://www.clashofdecks.com)

### What is a standalone expansion?

A standalone expansion is a pack of 36 cards that can complete and renew your gaming experience. Each standalone expansion can be played on its own, but they can also all combine with one another for a considerably deeper gameplay and infinite replayability.

10 standalone expansions will be published in 2022 / 2023: Treachery, Submersion, Breaching In, Deliquescence, Elusive, Resistance, Discord, Belligerency, Slyness and Boggging down.

You are a surviving Lord-Sorcerer of the Erret Archipelago where enormous bridges connect hundreds of islands together. Those bridges once made the Archipelago's grandeur and prosperity, allowing trade to flourish between islands. Indeed, the Archipelago's goods and riches that would transit solely through these bridges provided every denizen with a carefree life of comfort. But today, overpopulation, the depletion of natural resources and the blind greed of the Lord-Sorcerers have created a cataclysmic unbalance in the Erret Archipelago. Not a day goes by without the earth tearing apart and without the seas engulfing the most fragile of islands. The Lord-Sorcerers now fight for control of the higher and most secure islands of the Archipelago. To survive among those hostile lands, you must cross the bridges and fight the other Lord-Sorcerers to claim their lands!

## O BJECT OF THE GAME

Build a deck of 8 Creature or Incantation cards and fight other Lord-Sorcerers in order to destroy their Forts! To do so, try to reduce your opponent's Health Points (HP) to 0. This HP total is represented by the 8 cards that begin the game in your hand and the way your Stronghold card moves in your hand. You always see the position and orientation of your opponent's Stronghold in their hand, depicting how many HP they have left.

ONE EXPANSION  
IS GREAT

MULTIPLE EXPANSIONS  
IS BETTER!

# \$ETUP

Before starting a game of Clash of Decks, the players agree on a Format and a game Mode.

## 1. Choose a game Mode depending on the number of players:

- 1 player: Solo
- 2 players: Duel
- 2 players: Co-op
- 4 players: Free-For-All
- 4 players: 2vs2

## 2. Choose a game Format: Preconstructed, Draft or Constructed; then prepare your Deck accordingly.

**Exception:** For a Solo game, you cannot choose the Constructed format.

PLAYER A'S KINGDOM

PLAYER B'S KINGDOM

PLAYER A'S DECK

PLAYER B'S DECK

Then, follow the 5 setup steps:

- 1 Place the 2 Bridge cards in the play area.
- 2 Each player receives 1 Stronghold card.
- 3 Each player shuffles the cards in their Deck and takes them all in hand.
- 4 Each player places their Stronghold card at the leftmost position in their hand, Bastion side up.
- 5 Toss a coin to determine the 1st player.

The play area consists of 2 lines, each line expanding both sides of a Bridge card.

There is no limit to the number of cards that can be placed on a line.

Player A's Kingdom is located on the left of the Bridge cards. Player B's Kingdom is located on the right of the Bridge cards. It is therefore recommended for the players to sit side by side.

**Golden Rule:** In the event of a contradiction, the text of a Special Ability always prevails over the rules.

# FORMATS

## Preconstructed (beginner level)

You only need one copy of the Initiation Pack. This format is recommended for your first games. Each player chooses 1 of the 4 preconstructed Decks listed on the right.

**Solo Play:** The cards from the 3 other Decks will constitute the AI's Deck (page 7).

## Draft (intermediate level)

You will need a copy of the Initiation Pack or of at least one standalone expansion. This format is recommended once you have tried each of the preconstructed Decks. Players choose cards from a shared deck pile to build themselves a hand of 8 unique cards (along with the Stronghold). For the whole duration of the Draft, the cards chosen by the players remain visible.

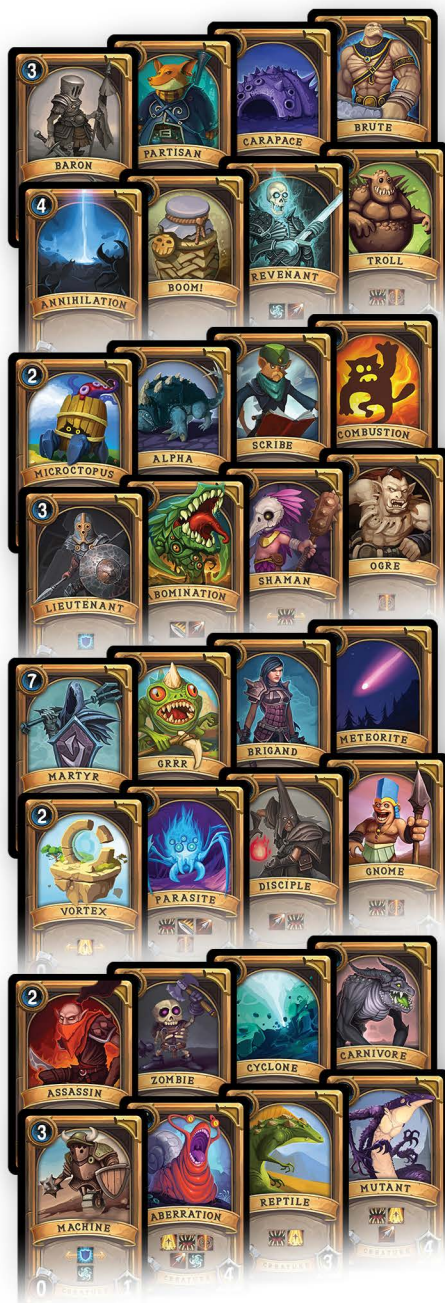

1. Form the deck pile by shuffling all the cards.
2. The players select cards by following these steps:
  - a. Reveal the first 4 cards from the deck pile.
  - b. Player A chooses 1 of the 4 available cards.
  - c. Player B chooses 2 of the 3 remaining cards.
  - d. Player A takes the last card.

If the players have less than 8 cards in hand each, return to step a., interverting Players A and B.

## Constructed (expert level)

Each player must own a copy of the Initiation Pack. To best optimize deck construction, we recommend you own each standalone expansion. This format is destined to experts who perfectly master the game's mechanisms, as well as the synergies between Special Abilities.

Before starting the game, each player builds their own Deck by choosing 8 cards among all the cards in the game. Before starting a game and before shuffling the cards of their decks, the players reveal the cards that constitute their decks.

**Clarification:** Duplicates are forbidden in all Formats. Each Deck must include 8 different cards.

# CARDS

Each Creature and Incantation card has a Mana cost indicated in their upper left corner.

## Creature Cards

Creatures have a Health Points (HP) value in the "shield" icon and an Attack value (AV) in the "axe" icon. Creatures enter play and stay in play until destroyed.

## Incantation Cards

Incantations can be played by the Active Player at any moment during Phase 2: Summoning. An Incantation can target any Creature (including the player's own Creatures) but can never target the enemy's Stronghold. When an Incantation is played, its effect is immediately resolved. The card is then returned to the rightmost position in their owner's hand.

## Stronghold Card

Each Stronghold card has a Bastion side and a Fort side. When "Stronghold" is mentioned, it refers to the card, regardless of the side that is up in their owner's hand.

The Stronghold card represents their owner's HP, according to its position in the hand. Destroyed cards returning in hand naturally shift the Stronghold card to the left, therefore replenishing the player's HP and Mana. This mechanism compensates a player for losing a Creature, rebalancing the power balance between the players as the game progresses. The more Creatures you have in play, the less cards you automatically have in hand, increasing the risk that your Stronghold reaches the rightmost position in your hand.

**Note:** A player whose only card in hand is their Stronghold card loses the game.

**Note:** Clash of Decks cards are compatible with 56x87mm sleeves.

## Special Abilities

The icons below depict the Special Abilities borne by some Creature or Incantation cards. Each Special Ability on a card in play is active at all times and automatically triggers: if it can apply, then it must apply. A Creature cannot stack multiple instances of the same Special Ability.

**Note:** When several Creatures must trigger Special Abilities effects, resolve them in this order: first, Creatures on the upper line, from furthest from the Bridge to closest to the Bridge; then Creatures on the lower line, from furthest from the Bridge to closest to the Bridge.

# DUEL MODE

A game is played over a succession of turns, starting with the 1st player's turn. The player whose turn it is called the Active Player. A turn is broken down in 3 Phases:

## Phase 1 – Mana Regeneration

The Active Player gains as much Mana as they have cards in their hand (Stronghold card included).

**Exception:** The first player only gains 6 Mana at the start of their first turn (instead of 9).

During their turn, the Active Player can use their Mana in Phase 2 to play cards from their hand (Creatures and Incantations). Unspent Mana is lost at the end of a turn.

## Phase 2 – Summoning

The Active Player can spend their Mana to play cards from their hand (Creatures and Incantations). They can choose not to play any card. They can only play the 4 leftmost cards in their hand at this time (not accounting for the Stronghold card), if they can pay the Mana cost.

**Note:** When a player plays a card from their hand, a new card in their hand becomes immediately available and can be played during the current turn if the player has enough Mana.

**Note:** Depending on the number of cards in hand, playing the same Incantation multiple times in a row is possible.

A player cannot spend more Mana than they have at this point. When a player plays a Creature, they place it face up in the play area, on the line of their choosing, always on their Kingdom's side and behind any Creature already in play on that line. A Creature remains in play until destroyed.

## Phase 3 – Assault

Each Creature controlled by the Active Player attacks, with the exception of Creatures played during the current turn. Creatures activate in the following order: first, Creatures from the upper line, from furthest away from the Bridge to closest to the Bridge; then Creatures from the lower line, from furthest away from the Bridge to closest to the Bridge. A Creature deals its AV to the enemy Creature which is the closest from the Bridge on its line. If no enemy Creature can be attacked, the attacking Creature deals damage directly to the enemy Stronghold.

## Attacking a Creature

When a Creature suffers at least as much Damage combined as its HP value, it is destroyed: excess Damage is lost and the card returns to the rightmost position in their owner's hand. If necessary, the owner immediately moves all their Creatures on that line toward the Bridge, filling the space that was thus freed.

A Creature that was not destroyed replenishes all its HP at the end of a turn. An attacked Creature does not strike back.

**Note:** If several Creatures are destroyed at the same time, the cards return to the right of their owner's hand in this order: first, Creatures from the upper line, from furthest away from the Bridge to closest to the Bridge; then Creatures from the lower line, from furthest away from the Bridge to closest to the Bridge.

**Note:** Excess Damage being lost, it is possible to absorb a high-value attack with a Creature with low HP.

## Attacking the Stronghold

When a Stronghold card takes Damage, shift that card that many positions to the right in the player's hand.

If the Bastion reaches the rightmost position in a player's hand, it is destroyed: rotate the Stronghold card so that the Fort is side up (and the Bastion side down) and put the Stronghold card back to the leftmost position in their owner's hand. Excess Damage dealt to the Bastion does not carry over to the Fort.

If the Fort reaches the rightmost position in a player's hand, that player immediately loses the game. Once the Active Player has resolved their Phase 3, their turn ends and their opponent becomes the Active Player.

## Game end

The game ends as soon as a player's Fort reaches the rightmost position in their hand. Their opponent wins the game.

# CLASH OF DECKS REVIEWS

# MULTIPLAYER MODES

## Setup

Place 4 Bridge cards in the play area.

The play area consists of 4 lines, each line expanding on both sides of a Bridge card. Each player shares a line with their enemy on the left and another line with their enemy on the right. Player A shares their top line with Player B and their bottom line with Player D. Player C shares their top line with Player B and their bottom line with Player D. Player C shares their top line with Player D and their bottom line with Player B.

## Game end and win conditions

The game ends as soon as a player's Fort shifts to the rightmost position in their hand. The enemy (or the enemy team) who owns the card that destroyed the Fort instantly wins the game.

**Exception:** The first player only gains 6 Mana at the start of their first turn (instead of 9), the second player only gains 7 Mana at the start of their first turn (instead of 9) and the third player only gains 8 Mana at the start of their first turn (instead of 9). The fourth player follows the regular rules by gaining as much Mana as they have cards in their hand.

## Free-For-All (4 Players)

The Free-For-All Mode gives you the chance to fight 3 other players in a battle during which the most cunning and chancer will win.

## Team Play (4 Players)

The Team Play Mode makes a 2 players versus 2 players fight possible, putting cooperation at the heart of the battle.

The **Free-For-All** and **Team Play** Modes follow the same rules as the **Duel Mode** with some significant adjustments indicated below.

### Specifics of the 4-Player Draft:

1. Shuffle 32 cards to form a deck pile.
2. The players select cards by following these steps:
  - a. Reveal the first 8 cards from the deck pile.
  - b. Player A chooses 1 of the 8 available cards.
  - c. Player B chooses 1 of the 7 available cards.
  - d. Player C chooses 1 of the 6 available cards.
  - e. Player D chooses 2 of the 5 available cards.
  - f. Player C chooses 1 of the 3 available cards.
  - g. Player B chooses 1 of the 2 available cards.
  - h. Player A takes the remaining card.
3. Repeat these steps by changing the order in which players select their cards until every player has 8 cards in hand: BCDAADCB, CDABBADC, DABCCBAD.

## Co-op (2 players and 2 AI)

The Co-op Mode allows you to coordinate strategies with your ally against enemy hordes swarming from AI's Kingdoms.

The **Co-op Mode** follows the same rules as the **Solo Mode** with some significant adjustments indicated below.

### Specifics Draft in Co-op Mode:

1. Shuffle 64 cards to form a deck pile.
2. The players select cards by following these steps:
  - a. Reveal the first 8 cards from the deck pile.
  - b. Player A chooses 1 of the 8 available cards.
  - c. Player B chooses 1 of the 7 available cards and give the 6 others to the AI.
  - d. If the players have less than 8 cards in hand, repeat these steps by switching Player A and Player B.
3. Shuffle the AI's 48 cards, divide them into 2 deck piles of 24 cards and pile them up, face down, to form both AI's deck piles.

The AI's difficulty level can be customized, at the players' discretion, by following the rules of the Solo Mode - Custom Play.

# SOLO MODE

The Solo Mode lets you play Clash of Decks alone, in Quick or Custom play.

All the base game rules apply. If a Solo Mode rule contradicts the rules, the Solo Mode rule prevails. AI refers to the Artificial Intelligence the Player faces in the Solo Mode.

## SOLO MODE - QUICK PLAY

### Setup of the Preconstructed Format:

The player chooses 1 of the 4 preconstructed Decks listed on page 4. The cards from the 3 other Decks will form the AI's Deck.

### Setup of the Draft format:

1. The Player receives 1 Stronghold card.
2. Place the 2 Bridge cards in the play area.
3. Form a deck pile by shuffling 32 cards.
4. The Player selects cards by following these steps:
  - a. Reveal the first 4 cards from the Deck.
  - b. The Player chooses 1 of the 4 available cards, giving the remaining 3 cards to the AI.
  - c. If the Player doesn't have 8 cards in hand, return to step a.
5. The Player shuffles the cards in their Deck and takes them in their hand.
6. The Player puts their Stronghold card to the leftmost position of their hand, Bastion side up.
7. Shuffle the AI's 24 cards and stack them face down to form the AI's deck pile.
8. Place 1 Stronghold card, Bastion side up, under the AI's deck pile.
9. The Player is the 1st Player.

### Gameplay

Your turn plays strictly the same as with the Duel Mode rule.

**Reminder:** You only have 6 Mana on the 1st turn.

The AI's turn plays as follows:

### Phase 1 – Mana Regeneration

During Quick Play, the AI gains a fixed

amount of 6 Mana and a variable amount of 1 Mana per Creature the Player currently has in play.

### Phase 2 – Summoning

Reveal the top card of the AI's deck pile and place it on the upper line in the AI's Kingdom, behind any Creature already in play.

If the total Mana value of the cards summoned in the AI's Kingdom this turn is lower than the AI's available Mana, reveal the top card of the AI's deck pile and place it on the lower line of the AI's Kingdom, behind any Creature already in play. Continue summoning cards, alternating between upper and lower line, until the value of the cards summoned by the AI this turn reaches or exceeds its available Mana.

If the AI reveals an Incantation card, the latter always targets the enemy Creature closest to the Bridge on that line. If there is no such target, the AI doesn't spend Mana, the Incantation card has no effect and it is discarded to the AI's discard pile.

The AI's discard pile is located next to its deck pile and consists of its destroyed Creatures and used Incantation cards.

### Phase 3 – Assault

When the AI suffers a direct attack from the Player's Creatures, put as many cards from the top of the AI's deck pile face up in the AI's discard pile as it was dealt Damage. When the AI's deck pile is empty and its Bastion revealed, rotate its Stronghold card so that the Fort is now side up, and form the AI's deck pile again by shuffling the AI's discard pile face down and stacking it on top of its Fort.

### Game end and win conditions:

The game ends in 2 cases:

- If the Player's Fort shifts to the rightmost position in their hand, the AI immediately wins the game.
- If the AI's deck pile is empty and its Fort is revealed, the Player immediately wins the game.

**AI Exception:** The cards that bear the Symbiote Special Ability merge with the AI's Creature closest to the Bridge on the line where the Creature with Symbiote was played. If there is no Creature available on this line, the card is placed in the AI's discard pile and its Mana is not spent.

**AI Exception:** A card with Price of Blood played by the AI costs 0 Mana. The AI discards as many cards from the top of its deck pile as the cost of Mana of the Creature or the Incantation.

**AI Exception:** A card with Vulnerability has an Attack value of 0 (instead of X-1) when it attacks the AI's AI's Bastion or Fort.

**AI Exception:** If one of the AI's Creature with the Regeneration ability deals Damages, the first card of the AI's discard pile is placed on top of its deck pile. If the discard pile is empty, nothing happens.

## SOLO MODE - CUSTOM PLAY

Customize the AI's difficulty level and try progressing to level 10!

We recommend that you practice with a few Quick plays before trying Custom Play, to ensure you master the rules and specifics of Clash of Decks' Solo Mode.

- After the Draft, choose a difficulty level between 1 (very easy) and 10 (very hard).
- Customize the AI by allocating as many difficulty points as the chosen level among the chosen parameters:
  - Determine the variable amount of Mana during the AI's Mana Regeneration phase:
    - +2 Mana for each Creature you have in play
  - Determine the fixed amount of Mana during the AI's Mana Regeneration phase:
    - 7
    - 8
    - 9
    - 10
  - Determine the 1st Player:
    - The AI
  - Determine the AI's resistance:
    - Attacks against the AI's deck pile only inflict 1 Damage each
  - Choose Special Abilities gained by all of the AI's Creatures:

SHARPENING

AQUATIC

BERSERK

CATALYST

VANISH

INSTINCT

PERFORATION

PROTECTION

RAGE

SPLASH

SPRINT

**Champion Module** (page 9) : you can choose to play with a custom Champion card. In this case, subtract 2 difficulty points from your Difficulty Level.

3. Play!

# CHAMPION MODULE

Champion cards are not featured in the Initiation Pack or the standalone expansions: these cards can only be created via the online card generator. Champion cards can be printed for free as Print and Play or ordered as Print on Demand on PVC cards via our online store: [www.clashofdecks.com](http://www.clashofdecks.com)

Champions are an optional module which adds new rules to the game. A Champion is a Creature with specific elements; all rules applying to Creatures therefore apply to them. If a Champion Module rule contradicts the base rules, the Champion Module rule prevails. The Champion Module can be played in the Draft and Constructed formats, as well as in the Duel, Multiplayer and Solo - Custom Play modes.

**Advice:** If you are not in a capacity to print or have Champion cards printed, you can simply designate any Creature card which is not part of your Deck as your Champion.

## Setup

After building their Decks, the players choose and reveal their Champion card. Each player chooses a single Champion card for the whole duration of the game. A Champion is not held in hand with the other Creatures or Incantations that belong to a player's Deck. It is instead placed face up on the table, near the play area, outside of the players' Kingdoms.

## Summoning Conditions

A Champion can be summoned like any other Creature, by paying its Mana cost. A Champion can be summoned during any Summoning phase, it is always considered as being among the 4 leftmost cards in their owner's hand. When you summon a Champion, pay 1 less Mana for each Creature, from both Kingdoms, that shares its exact Mana cost. An exhausted Champion cannot be summoned: it must be readied first.

## Re-Summoning Conditions

When a Champion is destroyed, it is not returned to their owner's hand. It is instead exhausted (turned horizontally) and placed near the play area again. As long as a Champion is exhausted, it cannot be summoned. As soon as any player (or AI for the Solo Mode) plays a card with the same exact Mana cost as a Champion, ready (straighten vertically) that Champion card.

# ACTIVATION ORDER

Activation order of a **Creature's** Special Abilities during the Assault phase:

1. Auras verification
2. Attack clearance: Creatures who have been in game for 1 turn / Rage
3. Target(s) identification: Defender / Aerial / Splash / Perforation
4. Sprint
5. Auras Update
6. Aquatic
7. Damages calculcation / Vulnerability
8. Dealing Damages / Protection
9. Memorisation of non-lethal Damages until the end of the Assault phase
10. The Creature(s) destroyed return in hand / Mercenary
11. Shifting of the Creatures to fill the spots left empty
12. Auras Update
13. Regeneration
14. Sharpening
15. Vanish
16. Shifting of the Creatures to fill the spots left empty
17. Auras Update
18. Berserk (go back to step 3.)
19. Instinct (go back to step 3.)

Activation order of an Incantation's Special Abilities during the Invocation phase:

1. Target(s) identification: Splash / Perforation
2. Damages calculation / Vulnerability
3. Dealing Damages / Protection / Indestructible
4. Memorisation of non-lethal Damages until the end of the Assault phase
5. The Creature(s) destroyed return in hand / Mercenary (Creature)
6. Shifting of the Creatures to fill the spots left empty
7. Auras Update
8. Regeneration
9. Sharpening
10. Incantation returns in hand / Mercenary (Incantation)
11. Vanish
12. Shifting of the Creatures to fill the spots left empty
13. Auras Update

# SPECIAL ABILITIES

**Important:** *owner* refers to the card bearing the Special Ability.

**AERIAL:** If the *owner* is on the upper line, it cannot attack enemy Creatures. It directly attacks the enemy Stronghold, ignoring enemy Creatures. Additionally granting the Rage Special Ability to the *owner* on the upper line has no effect. Additionally granting the Defender Special Ability to the *owner* on the upper line would prevent it from attacking Creatures as well as the enemy Stronghold.

**AQUATIC:** As long as the *owner* is adjacent to a Bridge, it deals double Damage. If the *owner* has the Sprint Special Ability, the attack bonus granted by Sprint will also be doubled.

**AURA:** Aura is always paired with another Special Ability. As long as the *owner* is in play, adjacent Creatures on the same line benefit from its paired Special Ability. The *owner* itself doesn't benefit from that Special Ability. As soon as the *owner* is moved or leaves play (returning back to their owner's hand), the two potential adjacent Creatures lose the effect granted by the Aura.

**BERSERK:** Each time the *owner* attacks and destroys at least one enemy Creature, it attacks again. Resolve all the attacks of the *owner* before resolving the attacks and effects of the next Creatures. After destroying the last enemy Creature on its line, because it must attack again, it attacks the enemy Stronghold (unless it attacks during the turn it entered play thanks to the Rage Special Ability).

**CATALYST:** If the *owner* is in play during your Phase 1, gain +2 Mana this turn. There is no limit to the amount of Mana a player can gain during Phase 1: Mana Regeneration.

**DEFENDER:** The *owner* can attack enemy Creatures but cannot attack the enemy Stronghold. This Special Ability is a malus. The *owner* is inherently stronger than other cards with the same Mana cost to compensate.

**INDESTRUCTIBLE:** The *owner* does not suffer Damage or effects from Incantations (it can still be targeted).

**INSTINCT:** After the *owner* has suffered at least 1 Damage from a Creature without being destroyed, it attacks the Creature closest to the Bridge on its line, after each of the attacks of the Creature attacking it are resolved. If there is no enemy Creature, the *owner* attacks the enemy Stronghold. The Instinct Special Ability activates after the Vanish Special Ability.

**MERCENARY:** When the *owner* should return to their owner's hand, it returns to the rightmost position in the enemy's hand instead (or on top of the AI's deck pile in Solo play). This Special Ability is a malus. The *owner* is inherently more powerful than other cards with the same mana cost to compensate.

**PERFORATION:** The *owner* deals its Damage to the target Creature AND to the Creature located behind it on the same line. This effect only applies to Creatures, never to the enemy Stronghold. Damage from an attack with more than one target is resolved in a single instance.

**PRICE OF BLOOD:** If you do not have enough Mana to pay for the *owner's* full cost, spend all your remaining Mana, then for each missing Mana, suffer one Damage by shifting your Stronghold one position to the right in your hand. Damage suffered this way is dealt in instances of 1.

**PROTECTION:** During each turn, Protection reduces the first source of Damage targeting the *owner* to 0. Sources of Damage include any Creature or Incantation dealing at least 1 Damage. Effects from these sources of Damage are still triggered (Splash, Perforation, etc.) and dealt to other Creatures as normal.

**RAGE:** The *owner* can attack enemy Creatures during the turn it enters play. This effect does not allow the *owner* to attack the enemy Stronghold the turn it enters play. If no enemy Creature can be attacked the turn the *owner* enters play, the Rage Special Ability has no effect.

**REGENERATION:** Each time the *owner* deals Damage to a target, shift the card *owner's* Stronghold one position to the left in their hand. If the Fort should shift left while it is already in the leftmost position in its *owner's* hand, the Fort is then rotated so the Bastion is side up, then moved to the second rightmost position in its *owner's* hand.

**SHARPENING:** When the *owner* deals enough Damage to destroy a Creature, any excess Damage is dealt to the Stronghold of the *owner* of the destroyed Creature. If more than one Creature is destroyed by a single attack (i.e. with Splash or Perforation), excess Damage is dealt to the enemy Stronghold in a single instance. The *owner* has no effect on a Creature with the Protection Special Ability, as reducing the Damage source to 0 generates no excess Damage.

**SPLASH:** The *owner* deals its Damage to the target Creature AND to the Creature in the same position on the neighbouring line. This effect only applies to Creatures, never to the enemy Stronghold. Damage dealt to more than one target is resolved in a single instance.

**SPRINT:** Each time the *owner* attacks, move it until it is adjacent to the Bridge card on the same line. This turn, the *owner* deals +X Damage, where X = the number of Creatures it moved over. It only attacks once, but its AV is modified until the end of Phase 3: Assault.

**SYMBIOTE:** When the *owner* enters play, it can be placed above another Creature already in play in its Kingdom. The AV, HP and Special Abilities of both Creatures stack as long as they remain in play. When destroyed, both cards are returned to their *owner's* hand, starting with the *owner*. The *owner* can also enter play as an independent Creature. The *owner* cannot be placed above another Creature that already has the Symbiote Special Ability. Symbiote doesn't stack Vulnerability with the other Creature's AV. Ignore the indicated AV, only applying Vulnerability. If the host or the *owner* bears the Special Ability Mercenary, the Mercenary card is the only one to return to the enemy's hand.

**VANISH:** After the *owner* has suffered at least 1 Damage without being destroyed, move it to the furthest position away from the Bridge on its line. Vanish triggers before the Instinct Special Ability.

**VULNERABILITY:** The *owner's* AV deals X Damage to an enemy Creature or Stronghold, where X = the target's HP -1. If the *owner* attacks more than one target (i.e. with Splash or Perforation), the effects apply to each target. This Special Ability weakens the target rather than destroying it. Paired with Special Abilities such as Sprint or Aquatic, the *owner* can destroy any target in a single attack. If the *owner* attacks the enemy Stronghold, it is shifted to the second rightmost position in the enemy's hand, without changing its side (i.e. the Bastion would remain side up).

# AN INCREDIBLE STORY

Clash of Decks was initially published in France in 2020, in an unusual form: a card game, the cards of which you had to cut out of a cardboard leaflet yourself. Then, a new standalone expansion was released each month. By the end of 2020, we decided to change the release model. Clash of Decks is dead...

Long live Clash of Decks! We launched our first Kickstarter Campaign in May 2021, with the goal of making the game's format evolve, with more conventional components, such as "real", larger and better quality cards, along with a storage box. Our main objective: make Clash of Decks accessible to everyone! We thus created a Kickstarter campaign with a daring bet: offer the game to all backers, free of charge! The Clash of Decks campaign was met with great enthusiasm and the support of more than 20,000 backers. This unique campaign has, in fact, allowed us to print and distribute more than 36,000 copies of the Clash of Decks Starter Kit.

We were back on Kickstarter at the end of 2021 thanks to a strong community of tens of thousands of players. As of this day, Clash of Decks is distributed in stores in France by Grammes Edition and in the rest of the world thanks to Lucky Duck Games.
